ANN AND ANL LIMITER FUSES

ANN and ANL limiter fuses are DC rated and are an economical alternative to the Class T fuses in a non-code installation. Often used to protect charging systems in battery-operated forklifts, golf carts and similar applications. These rugged, reliable fuses offer high amperage ratings in a compact size just 7/8" x 3 1/16". ANN fuses are rated at 125 volts, for applications up to 400 amps. ANL fuses are rated at 32 volts up to 300 amps. Durable glass-laminated melamine body and riveted construction offer superior service life in heavy-duty applications. Clear window provides open-fuse indication. Other amperages available by special order.

ANN Fuses
