POWER DISTRIBUTION MODULE AND FUSE BLOCK

Designed for high current applications and suitable for placement in extreme moisture and high vibration environments. -40°F (-40°C) to 185°F (85°C) temperature ratings.

Power Relay Module

Holds two J-Case cartridge style fuses and contains a 70amp sealed relay, which mates with Packard's Metri-Pack 150 series (Stock No. 38201) on page 35. One of the J-Case style fuses protects the relay and the other is a single-circuit inline fuse. This module is available with either an output connector lead or two output studs. Connectors sold separately.

With 2 Output Studs.
Stock No. 46095

Use with Output Connector
Stock No. 46043
Stock No. 46094

Power Fuse Module

Holds two J-Case cartridge style fuses – each a separate circuit. A silicone seal and removable cover offer weather-tight enclosure for the fuse position. Fuses sold separately.

Stock No. 46096
